SUMMARY

B.Sc. IT graduate with experience in software testing, test automation, and web application development. Hands-on experience creating and executing Playwright automated test cases for web applications, validating user workflows, authentication systems, form validations, and business processes. Skilled in manual testing, bug identification, API testing, and automation using JavaScript and Playwright.

TECHNICAL SKILLS

- **QA & Automation Testing:** Playwright, Manual Testing, Automation Testing, Functional Testing, Regression Testing, Smoke Testing, Test Case Design, Bug Reporting, End-to-End Testing
- **API Testing:** Postman, REST APIs, JSON
- **Languages:** JavaScript, TypeScript (Basic)
- **Tools:** Git, GitHub, Chrome DevTools
- **Web Technologies:** HTML, CSS, React (Basic), Node.js
- **Familiar With:** MongoDB, Linux

PROJECTS

Worklance – Job Marketplace | React, Node.js, Express.js, MongoDB, Playwright

🔗 <https://worklance-nu.vercel.app>

- Developed and executed 283+ Playwright automated test cases covering authentication, user registration, login, job applications, and recruiter workflows
- Performed functional and regression testing to validate business-critical user journeys and application stability
- Validated UI behavior, form validations, error handling, and role-based access control for Candidate and Recruiter modules
- Generated automated test execution reports and identified defects during testing cycles
- Designed REST APIs for authentication, job listings, and applications
- Built JWT and OTP-based authentication with role-based access control
- Implemented hiring pipeline with status tracking (Screening → Interview → Hired)

Flirtyfy – AI Dating Assistant Mobile App | React Native, Expo, TypeScript, OpenRouter

- Built AI-powered mobile application for generating context-aware dating replies, bio rewrites, and conversation openers
- Developed AI vision-based conversation reconstruction pipeline for extracting chats from Instagram, WhatsApp, and Tinder screenshots
- Integrated OpenRouter APIs with Vercel serverless backend functions for AI response generation and prompt orchestration
- Implemented tone-based reply generation system supporting Funny, Flirty, Romantic, Savage, Direct, and Gen Z styles
- Designed reusable mobile UI architecture using React Native, Expo Router, and TypeScript
- Solved production debugging issues across localhost, Android APK builds, and serverless deployment environments

EDUCATION

Bachelor of Science in Information Technology (2026)
S.K College of Science and Commerce, Mumbai
