SUMMARY

Entry-Level Manual QA Tester with hands-on experience testing full-stack web applications. Skilled in manual testing, test case design and execution, functional testing, regression testing, cross-browser testing, API testing using Postman, and defect identification and reporting. Experienced in validating application functionality and ensuring software quality.

TECHNICAL SKILLS

QA & Automation Testing: Playwright, Manual Testing, Automation Testing, Functional Testing, Regression Testing, Smoke Testing, Test Case Design, Bug Reporting, End-to-End Testing, Quality Assurance
Methodologies: Agile, Scrum, SDLC, STLC
Languages: Core Java basic, SQL
Tools: Git, GitHub

PROJECTS

Worklance – Job Marketplace | *React, Node.js, Express.js, MongoDB, Playwright*
https://worklance-nu.vercel.app

- Increased automated regression test coverage across 5 user workflows by designing and executing 283+ Playwright test cases in TypeScript for authentication, registration, and job-application scenarios.
- Reduced post-release defects by combining manual testing with functional and regression testing as part of the QA process for business-critical user journeys.
- Identified 25+ UI and validation defects through cross-browser testing of form validations, error handling, and role-based access control across Candidate and Recruiter modules.
- Cut defect-resolution time by generating test execution reports and logging bug reports through a structured defect-tracking workflow within the STLC.
- Enabled secure login and job-application flows by designing 10+ REST APIs and validating endpoints through manual API testing.
- Strengthened account security by implementing JWT and OTP-based authentication with role-based access control for 2 user types (Candidate, Recruiter).
- Streamlined recruiter decision-making across the SDLC by building a 3-stage hiring pipeline (Screening → Interview → Hired) with real-time status tracking.

Flirtyfy – AI Dating Assistant Mobile App | *React Native, Expo, TypeScript, OpenRouter*

- Launched an AI-powered mobile app generating context-aware dating replies, bio rewrites, and conversation openers across 3 core use cases.
- Automated chat data extraction by building an AI vision-based pipeline that reconstructed conversations from Instagram, WhatsApp, and Tinder screenshots with 90% accuracy.
- Powered real-time AI response generation by integrating OpenRouter APIs with Vercel serverless functions, cutting average response latency to under 2 seconds.
- Expanded user personalization by implementing 6 tone-based reply styles (Funny, Flirty, Romantic, Savage, Direct, Gen Z) within the AI response engine.
- Improved UI maintainability by designing a reusable component architecture in React Native, Expo Router, and TypeScript across 15+ screens.
- Resolved 95% of cross-environment bugs by debugging production issues across localhost, Android APK builds, and serverless deployments.

CERTIFICATIONS

Playwright 101 – TestMu AI (formerly LambdaTest) | *June 2026*
Credential ID: P101-DZHIC2 | Verification: testmuai.com/certified/P101-DZHIC2/
Playwright 102 – TestMu AI (formerly LambdaTest) | *June 2026*
Credential ID: P102-1UBJ9P | Verification: testmuai.com/certified/P102-1UBJ9P/

EDUCATION

Bachelor of Science in Information Technology
S.K. College of Science and Commerce, Mumbai University
Graduated: April, 2026
